Education

Sahyadri College of Engineering and Management

Bachelor of Engineering in Computer Science - **9.33 CGPA**

2022 – 2026

Mangalore, Karnataka

Poornaprajna PU College

Pre-University Education - Science (PCME) - **93.5 Percentage**

2020 – 2022

Udupi, Karnataka

Experience

Anelos Softwares

January 2026 - March 2026

Software Engineer Intern - Frontend

Remote, Kundapura, Karnataka

- Implemented secure admin authentication using AWS Cognito, JWT-based RBAC, and backend IAM roles to control access across DynamoDB and PostgreSQL.
- Optimized homepage latency by engineering a secure, read-only DynamoDB query mechanism within Next.js Server Components, utilizing AWS IAM roles, strict XSS data sanitization, and client-side caching.
- Integrated the CMS banner API with ISR, image optimization to ensure rapid page delivery and improved SEO.

Projects

DeepLock | Python, Flask, OpenCV, TensorFlow, JWT Authentication, React.js

September 2025

- Built an AI-powered platform leveraging deep learning architectures to detect deepfakes.
- Implemented RESTful APIs and a component-driven React.js frontend to support interactive user access.
- Integrated blockchain to ensure tamper-proof storage of detection outcomes.

QVista | MongoDB, Express.js, React.js, Node.js

March 2025

- Designed a full-stack queue management system with real-time position monitoring and scalable system design.
- Integrated dynamic queue functionalities such as automatic updates with status categories managed via RESTful APIs.
- Created a responsive admin dashboard with data visualization to track queue trends and enhance service efficiency.

EaseSpend | MongoDB, Express.js, React.js, Node.js, JWT Authentication, Recharts

December 2024

- Built a secure expense management system featuring JWT-based authentication, role-based access control, and RESTful APIs for streamlined CRUD operations.
- Developed an adaptive, responsive frontend with category-wise expense tracking and interactive financial analytics powered by Recharts.

Technical Skills

Languages: Java, Kotlin, HTML, CSS, SQL, Python(basic)
Developer Tools: VS Code, Jupyter Notebook, Git, GitHub, Vercel, IntelliJ
Technologies/Frameworks: React.js, Flask, OpenCV
Databases: MySQL, MongoDB, PostgreSQL

Certifications

Prompt Engineering & Programming with OpenAI - Columbia+

Completed: July 2025

Database and SQL - Infosys Springboard

Completed: February 2025

Kotlin Programming - Infosys Springboard

Completed: March 2026

Achievements

Co-Author, IEEE Published Conference Paper

November 2025

Co-authored "AI-Powered Blockchain-Backed System for Cross-Media Deepfake and Forgery Detection" published in the 2nd IEEE International Conference (COSMIC).

SCEM

2nd Place in TechVision-2025

May 2025

Achieved second place in TechVision Event for the project **DeepLock**

SCEM

Volunteer Experience

Placement Volunteer

Assisted in organizing and coordinating over **10+** campus placement drives.

SCEM
