Education

Sahyadri College of Engineering and Management

Bachelor of Engineering in Computer Science - **9.33 CGPA**

2022 – 2026

Mangalore, Karnataka

Poornaprajna PU College

Pre-University Education - Science (PCME) - **93.5 Percentage**

2020 – 2022

Udupi, Karnataka

Experience

Anelos Softwares

January 2026 - March 2026

Software Engineer Intern - Frontend

Remote, Kundapura, Karnataka

- Engineered secure admin authentication system using AWS Cognito, JWT, and RBAC, improving access control across DynamoDB and PostgreSQL.
- Designed a secure read-only data access mechanism using AWS IAM roles with XSS protection and caching strategies.
- Integrated CMS APIs with Incremental Static Regeneration (ISR) and image optimization, enhancing SEO performance and page load speed.

Projects

DeepLock | Python, Flask, OpenCV, TensorFlow, JWT Authentication, React.js

September 2025

- Developed an AI-powered deepfake detection system using deep learning models for image, video and audio analysis.
- Built scalable RESTful APIs and an interactive frontend enabling real-time user interaction.
- Integrated blockchain-based storage to ensure tamper-proof verification of detection results.

QVista | MongoDB, Express.js, React.js, Node.js

March 2025

- Designed and deployed a full-stack queue management system with real-time position tracking.
- Implemented dynamic queue updates and status handling via REST APIs, improving system responsiveness.
- Created a responsive admin dashboard with data visualization to track queue trends and enhance service efficiency.

EaseSpend | MongoDB, Express.js, React.js, Node.js, JWT Authentication, Recharts

December 2024

- Developed a secure expense tracking system with JWT authentication and role-based access control (RBAC).
- Designed an interactive dashboard with category-wise analytics and charts, improving financial insights.
- Built RESTful APIs for efficient CRUD operations and financial data handling.

Technical Skills

Languages: Java, Kotlin, Python (Basic), SQL, HTML, CSS

Frameworks & Libraries: React.js, Flask, OpenCV

Technologies: REST APIs, JWT Authentication, RBAC, AWS

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Git, GitHub, VS Code, IntelliJ, Jupyter Notebook, Vercel

Certifications

Prompt Engineering & Programming with OpenAI - Columbia+

Completed: July 2025

Database and SQL - Infosys Springboard

Completed: February 2025

Kotlin Programming - Infosys Springboard

Completed: March 2026

Achievements

Co-Author, IEEE Published Conference Paper

November 2025

Co-authored "AI-Powered Blockchain-Backed System for Cross-Media Deepfake and Forgery Detection" published in the 2nd IEEE International Conference (COSMIC).

SCEM

2nd Place in TechVision-2025

May 2025

Achieved second place in TechVision Event for the project **DeepLock**

SCEM

Volunteer Experience

Placement Volunteer

Coordinated and supported 10+ campus placement drives, improving event execution efficiency.
